

**1. Technical description**

Splitter **P-POE2** enables transfer of power and data to two IP PoE cameras or other devices, that are compliant with this standard, using UTP twisted pair cable cat. 5e. It uses 4 pairs of wires, where two pairs support one device, while the other two support second device. This requires only the use of accessories that are compliant with the 802.3af/at mode A (endspan) standard, transmit data and power supply in pairs 1/2 and 3/6. Device is designed to work in 10/100Mb/s networks.

**Connection schemes**
